### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al (US 6,305,062) in view of Tsuzaki et al (US 6,334,378).

Chen et al teaches a preventative maintenance apparatus for CMP top-ring's backing film and the method thereof. The method comprises providing the CMP machine having a shaft and a detachable top ring disposed on the shaft, wherein the top ring is provided with a plurality of air holes, a detachable guide ring, and a replaceable backing film 100, and the backing film is pre-drilled by a laser to produce a plurality of holes that correspond to the air holes 101. The top ring is disassembled from the shaft before the preventative maintenance for the backing film processed, the top ring is cleaned after disassembling the guide ring from the top ring and the used backing film is removed. The new backing film is put on the top ring and assembled to the shaft. See the abstract, claims 1-6 of Chen et al, and Fig. 9

Chen et al fails to teach a punching apparatus as claimed in claim 8 of the present invention.

Tsuzaki et al teaches a perforator (punching apparatus) having a base 21, a first plate 28, and a second plate 29 with a plurality of punches 33. Figure 1 illustrates how plate 28 has dies (lead holes) 34 that correspond to the punches 33. The film runs between the two plates. See also

col. 4 lines 32-67. The motivation to pre-drill the backing film of Chen et al with the perforator of Tsuzaki et al is that that this type of apparatus provides an enhanced level of control. Thus, it would have been obvious for one of ordinary skill in the art at the time of the claimed invention to combine the teachings of Chen et al and Tsuzaki et al.

Regarding claim 10, the rollers onto which the film lies is deemed a concave portion.

### ***Response to Arguments***

3. Applicant's arguments with respect to claim 8 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
